## High Profile Space Requires New Contemporary Look

Advanced Sales was moving from the top floor of their building to a high-exposure main floor suite and needed to update their furniture with a clean, modern look. They visited Kentwood Office Furniture’s showroom and were immediately drawn to the Global Zira product. They visited

other showrooms, but decided that Zira provided the look they had in mind. Kentwood Office Furniture came up with a workable solution in a short period of time and helped make their contemporary workspace vision a reality.
