Industry: Auto Research and Development

Application:

- Conference Room

Products:

- Custom Conference Table

Creative Custom Table Provides the Perfect Solution for CAMP

Crash Avoidance Metrics Partnership (CAMP) needed a very large 24 foot by 5 foot conference table for frequent meetings with a large number of people. They were struggling to find a table that met their needs, but also met their limited budget. They also needed to ensure that the table had a large number of power/data modules. Kentwood Office suggested a custom fabrication table. Kentwood

constructed a 2 piece laminate table with 1 3/4" built up edges. The bases were designed with wire management and wire access. Power unit openings were factory cut to fit Byrne Electrical 8 position MHO aluminum electrical/data units. The table included 24 electrical outlets, 24 CAT5 data outlets, VGA and HDMI ports. The end result was a beautiful table at the right price that fit the customer's requirements.
