- HON Ignition Seating
- HON Volt Seating

Merger Brings New, Expanded Space for Pathology Laboratory

A merger between Pathology Laboratory and Kent Pathology required combining both existing facilities into one larger space. This presented the opportunity to create a new, better space for everyone. Pathology Laboratory has been a customer of Kentwood Office Furniture for the past 8 years. In that time, Kentwood has consistently

met their design needs and their budget. Pathology Laboratory turned to Kentwood to help them make the most of their new space. Kentwood was familiar with their special requirements, and utilized remanufactured Herman Miller stations to design a fitting layout at a great price.
