## Productive, Collaborative New Space for Lean Logistics

Lean Logistics, the global leader for innovative transportation solutions, was experiencing rapid growth. The company wanted to bring all of its employees under one roof. The new 50,000 sq ft space with furniture from Kentwood Office would do just that. Kentwood had worked with Lean

Logistics in the past and was awarded the project based on the affordable product mix, superior customer service, and excellent results. The Kentwood design team developed a product layout that met the diverse needs of the employees and increased teamwork and flexibility.
